

Why Modulo?

Simplifying Internal Timber Doorsets™

✓ Simple to **Specify**

Suitable for all project types; Modulo is simple to select and specify, reducing design time and planning costs. The diverse range of standard finishes can create unique, cost effective designs with short lead times.

✓ Simple to **Procure**

Our unique pricing configurator makes door procurement simple offering competitively priced doorsets and strategic savings across your project.

✓ Simple to **Install**

The modular adaptable system is pre-cut, morticed and mitred, along with the option of the rapid-fit bracket system allows for simple and fast installation using basic tools.

✓ Simple to **Manufacture**

Off-site manufacturing precision. Minimal lead times from order placement to delivery, providing the industry with world-class lead times.

Features & Benefits

The **adaptable doorset** system to **accommodate on-site variations**

Historically, doors and linings were bespoke items modified on-site to suit the opening where they were fitted.

Things have moved on with the advances in manufacture driven by the cost, and shortage of skilled site labour. The Modulo concept represents a quantum leap by making an 'off-the-shelf' solution with an intelligent installation system to allow for a minimum of 20mm of adjustment in each dimension ensuring perfectly fitting doors in structural openings that have not been accurately formed.
